The Department provides the following programs and specialized services:

- **Accelerated Rehabilitative Disposition (ARD)** – This Program is comprised of first-time offenders. The majority of offenders are charged with Driving Under the Influence (DUI). New offenders report for intake, then report in the fourth and eighth months. The offenders are to report by Call Trac for the remainder of their supervision unless an issue arises. If a participant successfully completes supervision, the case is expunged. The Department, also, operates an ARD Program for Magisterial District Judges for summary offenders. The typical participant in this Program is a college student, as underage drinking is the most common offense students are charged with. These cases are, also, expunged upon successful completion.

- **Community Service Program** – The Department monitors the completion of community service hours ordered by the Court. Each adult probation officer is responsible to ensure that offenders comply with this condition.

- **Drug Treatment Court** - This Program was implemented in January 2007, and is for Level 3 and Level 4 Sentencing Guideline Offenders. It is funded by a Pennsylvania Commission on Crime and Delinquency (PCCD) Grant administered by the Armstrong-Indiana/Clarion Drug & Alcohol Commission. It is an intensive supervision program for offenders with serious substance abuse problems. They begin the Program by entering an inpatient drug and alcohol program, if recommended. They then either enter a halfway house or return home and participate in an intensive outpatient drug and alcohol program. Participants are placed on house arrest, with either Electronic Monitoring (EM) or Secure Continuous Remote Alcohol Monitoring (SCRAM), upon release from inpatient treatment. Each offender is assigned a case manager and an adult probation officer, who meets with the offender three (3) times per week. Each offender must appear in Court every Thursday for his progress to be reviewed. The Treatment Team meets prior to Court to review cases. Frequent urinalysis testing is administered. Supervision is gradually stepped-down until offenders successfully complete the Program.

- **Intermediate Punishment Program** – The majority of this Program is comprised of DUI offenders. Each offender is sentenced by the Court to participate in this Program. Electronic Monitoring is required for all participants.

- **Pre-Trial Services Program** – The Pre-Trial Program Officer evaluates every case that enters the Indiana County Jail on new criminal charges. The pre-trial officer recommends whether a defendant should be Released on Recognizance (ROR) or unsecured bond, or if bond should be raised, lowered or revoked, and, also, recommends what conditions of bail would be appropriate. The Pre-Trial Program Officer supervises defendants released on bail by the Court. Supervision consists of office and field contacts, and the officer can direct defendants into treatment.

- **Probation Without Verdict (PWV) Program** – This Program is similar to the ARD Program; however, the PWV program is for first-time minor drug offenders, facing charges such as possession of a small amount (of marijuana) and possession of drug paraphernalia.

- **Work Release Program** – One (1) adult probation officer is assigned to this Program to monitor inmates approved for work release. To establish eligibility, inmates need a letter from their
prospective employer, proof of workers compensation insurance and a permanent schedule. The Chief Probation Officer approves the request. The Court then enters an Order approving the release. The supervising probation officer sees work release inmates at their respective worksite weekly and conducts urinalysis testing.
