LEBANON COUNTY

The Department provides the following programs and specialized services:

- **Alcohol Safe Driving Program (ASDP)** – This Program coordinates the scheduling of the Alcohol Highway Safety School mandated for Driving Under the Influence (DUI) offenders. The goal of this Program is to ensure compliance with the Court-ordered condition. The Department has three (3) adult probation officers qualified to teach the course and uses the services of one (1) outside contractor. The officers, also, complete the Court Reporting Network (CRN) evaluations.

- **Community Service Program** - This Program coordinates the placement of offenders with appropriate agencies to complete Court-ordered community service hours. Unemployed offenders are also placed in the Program. Offenders assigned to County work projects perform such services as snow removal, cleaning buildings, lawn care, setting up stands for the County fair, curb painting, cleaning up parks, and paper drives.

- **Costs and Disbursement Unit** – The goal of this Unit is to collect Court-ordered moneys from offenders. The Unit has seven (7) staff, including two (2) collections officers, who monitor offenders who have not paid all costs prior to release from supervision. If necessary, the Unit pursues contempt charges.

- **Driving Under the Influence (DUI) Court** – This Program targets the second or third time Driving Under the Influence (DUI) offender. Offenders are screened prior to the Court appearance and must agree to participate before they are recommended to the Court for participation. The Program includes electronic monitoring, treatment, intensive supervision, and placement on Secure Continuous Remote Alcohol Monitoring (SCRAM).

- **Electronic Monitoring Program** – This Program monitors the compliance of offenders placed on electronic monitoring by the Court. The goal of the Program is to provide the Court with a sentencing alternative and to reduce the inmate population at the Lebanon County Correctional Facility. The Department uses Global Positioning Satellite (GPS) technology through Sentinel.

- **Intensive Supervision** – The goal of this Program is to provide intensive supervision to high-risk offenders. The Unit, also, supervises special needs offenders with the goal of coordinating treatment and Court-ordered supervision. The assigned adult probation officer works closely with the mental health caseworker to ensure that the treatment needs of the offender are met. Sexual offenders receive intensive supervision and are subject to special conditions applicable to the nature of their offense.

- **Renaissance Crossroads Program** – This Program is a Drug and Alcohol Treatment-Based Restrictive Intermediate Punishment Program for Level 3 and Level 4 Sentencing Guideline Offenders. The goal of the Program is to provide long-term treatment to offenders that would otherwise be facing a State prison sentence. The expected outcome is that the cycle of drug and/or alcohol dependency and criminal behavior will be broken. The Program is funded by a grant from the Pennsylvania Commission on Crime and Delinquency (PCCD). The Program is thirty-four (34) months long. The offender spends the first twelve (12) months in an in-patient Program followed by six (6) months of electronic monitoring, and sixteen (16) months on intensive or regular supervision.
Lebanon Day Reporting Center - The Lebanon County Day Reporting Center (DRC) is a program designed to help reduce the county’s jail population by offering an alternative to incarceration for those with nonviolent charges. The primary emphasis of this program is two-fold, focusing on rehabilitation of the participant and community safety. The program is designed to assist participants in connecting with community resources and to provide job skills training that will enable long-term employment. In addition, the DRC provides each participant with the opportunity to improve their whole self by connecting them with local therapy providers, parenting classes, life skills training, and by offering spiritual programming and healthy living strategies. In order to complete the program successfully, each participant is required to report according to program requirements and successfully obtain steady employment.
